

# Classification

Putting things into groups

- Start with large groups, then you separate them into smaller groups
- You keep separating the groups until you only have one thing left.
- we classify to make it easier to communicate
- We put things into groups that have similar characteristics and traits

## Living things

All living things have these things in common:

Breathing

Need water

Need energy/ food

Grow

Reproduce

## 6 Kingdoms of Living Things

-Every living thing fits into one of these kingdoms

1. Animals
2. Plants
3. Fungi - Mushrooms, Mold, yeast
4. Protists - 1 cell or a few cells
5. Archeabacteria - Very old-prehistoric
6. Eubacteria -New bacteria
