

Name _____

Pea Seeds Lab

Hypothesis:

Overview:

Materials:

Sugar Snap Pea Seeds

1 Clear plastic cup

Paper towels (enough to fill the cup)

Procedure:

1. Obtain a clear plastic cup.
2. Fill the cup with paper towels.
3. Place pea seeds between the inside of the cup and paper towels, so that the seeds can be seen through the cup.
4. Add appropriate amount of water to the paper towels (depending on the hypothesis).
5. Place the cup according to your hypothesis.
6. Observe the seeds every day, and record all observations in your notebook.

Observations: Attached

Conclusion:

All parts must be in this order, and identified as it is shown here.

All observations get stapled to the back of this.

All observations must be in chronological order.

Points will be deducted for not following this format.
